- Badminton

About Me

As a highly skilled and motivated Full Stack Developer/Software Engineer, I bring a wealth in designing and developing web applications using modern technologies. I am adept at delivering high-quality solutions that meet client needs and exceed expectations.

Work Experience

Kaiser Appliances sector 69 Faridabad , 9899141592

Aug 2023-December 2023

Demonstrated exceptional attention to detail in accurately inputting, verifying, and maintaining large volumes of data, ensuring data integrity and completeness

Delimp Technology pvt.ltd

feb2023-june2023

During my academic journey, I undertook a challenging project focused on developing a trading application utilizing React.js and Spring Boot. The goal of the project was to create a user-friendly platform that incorporated real-time equity and stock data, along with a comprehensive user interface for trading, as well as robust authentication and authorization functionalities for seamless signup and login experiences.
Key features of the project included:
- User-friendly and intuitive user interface developed using React.js.
- Integration of real-time equity and stock data for live market updates.
- Comprehensive authentication and authorization mechanisms for secure signup and login processes.
- Seamless trading functionality, enabling users to perform transactions efficiently.
- Robust error handling and validation to ensure data integrity and system stability.
- Integration of modern design principles and user experience (UX) considerations to enhance usability.

Softsynth Solutions pvt.ltd

feb2022-jan 2023

- Working on building a free email service application (Clone of gmail)
- MCQ questions web development
- Small web developing site where we can achieve good scores, where we had a plenty of questions to solve and also a featuring camera over there.

Projects

Project Title: E-Dashboard

Project Description:
Developed a web application for managing products with CRUD operations, user authentication, authorization, and database integration.

Technologies Used:
- Frontend: React.js
- Backend: Node.js, Express.js
- Database: MongoDB
- Authentication: JSON Web Tokens (JWT)

Key Features:
- Implemented CRUD operations for product management, allowing users to create, read, update, and delete products.
- Designed and implemented user authentication and authorization system, ensuring secure access to the application with role-based permissions.
- Integrated MongoDB database for storing product data, ensuring data persistence.

My Role:
- Sole developer responsible for the design, development, testing of the e-dashboard project.

Achievements:
- Successfully implemented user authentication and authorization, ensuring secure access to the application.

Project Title: OTP Verification system with Frontend

Project Description:
Developed a web application for OTP (One-Time Password) verification. Implemented a secure mechanism to send OTPs for user verification purposes.

Technologies Used:
- Backend: Node.js,Express.js
- Libraries/Frameworks: Nodemailer
- Frontend: React.js

Key Features:
- Automated OTP Generation: Generated random one-time passwords for secure user verification.
- User Verification: Validated OTPs entered by users to complete the verification process.

My Role:
- Sole developer responsible for the design, development, and implementation of the Gmail OTP verification project.

Achievements:
- Successfully implemented OTP verification via Gmail, enhancing the security of the application.

Project Title : Expense Tracker

Project Description:
Developed a comprehensive expense tracker web application to manage personal finances efficiently. The application allows users to track expenses, incomes, and calculate total balance dynamically. It provides a user-friendly interface for adding, updating, and deleting expenses and incomes.

Technologies Used:
- Frontend : Html, Css
- Backend : Java Script

Key Features:
- Enables users to record their expenses with details such as category, amount and description.
- Dynamically calculates the total balance by subtracting expenses from incomes.
- Provides functionality for adding, updating, and deleting expenses and incomes.
- User-friendly interface with intuitive design for easy navigation and interaction.

My Role:
- Sole developer responsible for conceptualizing, designing, and implementing the expense tracker application.

Achievements :
- Successfully created a robust expense tracker application, aiding users in managing their finances effectively.
